

Level 3 Garment Maker End-Point Assessment

As part of Skills and Education Group Awards, we specialise in endpoint assessments for the fashion and textiles sectors. Our experience with the standards for these industries means we know exactly what employers and apprentices need. We make the assessment process clear, easy to use and responsive, ensuring that employers and apprentices are fully supported throughout.

About the End-point assessment

The broad purpose of the occupation is to construct garments – bringing the design to life, following specifications and quality standards. A garment maker may work on one-off products for specific customers or garment samples to be replicated. They help determine the best production method for each design, review fit, deal with manufacturing issues and monitor resources.

Garment makers know and understand the end-to-end garment making process. They are extremely proficient sewers, operating sewing machines effectively and applying stitching techniques by hand. They work with different materials and trimmings, appropriate to the design.
